Professional Summary

Driven Computer Science undergraduate combining solid academic foundations with hands-on experience in building AI-assisted web applications. Proficient in Python, C, and JavaScript, with a proven track record of developing scalable platforms (including an 8,000+ line web project) and integrating logical problem-solving to deliver functional, real-world solutions. Highly adaptable and focused on leveraging AI tools to optimize development workflows.

Education

United International University (UIU) — Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering (CSE) — *2024 – Present*

Govt. Prafulla Chandra College — Bagerhat, Bangladesh
Higher Secondary Certificate (HSC) - Science | GPA: 5.00 — *2020 – 2022*

Bagerhat Government High School — Bagerhat, Bangladesh
Secondary School Certificate (SSC) - Science | GPA: 5.00 — *2020*

Technical Skills

Languages: Python, C, C++, JavaScript, HTML5, CSS3
AI & Data Science: Prompt Engineering, API Integration (OpenAI/Gemini), Pandas, NumPy, Scikit-Learn
Web Development: Frontend Development, API Handling, Canvas API, Email.js
Developer Tools: Git, GitHub (Pages & Actions), VS Code

Projects

UIUJEF Official Website | *Full-Stack Developer*

- Spearheaded the development of a fully responsive official club platform (uiujef.org), writing over 8,000 lines of code to deliver a complete web solution.
- Integrated dynamic UI components to ensure smooth cross-device compatibility and an intuitive user interface.

AI-Powered Disease Diagnosis System | *AI Integration & Web Developer*

- Built an interactive healthcare web application that processes user-inputted symptoms to predict potential diseases.
- Utilized AI logic to analyze data effectively, providing accessible and real-time medical insights for non-technical users.

Synapse OS (v5.0 PRO) | *Frontend Developer*

- Developed a clinical dashboard interface from scratch utilizing Vanilla JavaScript and HTML5 Canvas.
- Designed interactive data visualization modules to track and represent medical data efficiently.

Titanic Survival Prediction Model | *Python, Pandas, Scikit-Learn*

- Conducted exploratory data analysis (EDA) on historical passenger data to identify survival trends.
- Applied data visualization techniques to map feature correlations logically.

Achievements & Certifications

Agent X Bangladesh Participant (2025): Completed Microsoft-collaborative AI training and hands-on custom GPT creation through NetCom Learning.
Competitive Programming Bootcamps (2025-2026): Participated in the ICPC Asia Dhaka Regional Contest bootcamp and the Phitron Rising Coders Challenge.
Machine Learning Specialization: Completed coursework by Stanford University via Coursera, establishing a core understanding of ML algorithms.
